Re: CC Licenses, LLC (CCL)
WSYR (AM), Syracuse, New York
Facility Identification Number: 48720
Special Temporary Authority (STA)
BESTA- 20121205AAQ

Dear Mr. Langham:

This is in reference to the request filed December 5, 2012. CCL requests further extension of the STA granted on June 29, 2006, to operate Station WSYR with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power.¹ In support of the request, CCL states that all repair work on the antenna system has not yet been completed.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WSYR may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with a nondirectional antenna and reduced power not to exceed 1.25 kilowatts also is authorized, only as necessary to facilitate the repair

¹ WSYR is licensed for operation on 570 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

work. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must notify the Commission when licensed operation is restored.² CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 9, 2013**. It should be noted that failure to file an acceptable FCC Form 301 application for a construction permit to resolve all antenna system issues, or a direct measurement of power application on FCC Form 302 containing partial proofs to verify the station has properly resumed licensed operations may result in a denial of any further requests for STA.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joseph Szczesny", with a long horizontal flourish extending to the right.

Joseph Szczesny, Engineer
