Re: WTLN (AM), Orlando, Florida
        Facility Identification Number: 48731
        Pennsylvania Media Associates, Inc. (PMA)
        Special Temporary Authorization (STA)
   BESTA - 20121126ASQ

Dear Counsel:

This is in reference to the request filed November 26, 2012. PMA requests further extension of the special temporary authority (STA) granted on July 28, 2010, to operate Station WTLN with increased nighttime operating power to overcome interference from a Cuban station. In support of the request, PMA station that the station continues to receive significant interference from the Cuban Station.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WTLN may continue to operate during nighttime hours with increased nominal power not to exceed 10 kilowatts. It will be necessary to reduce power or cease STA operation if complaints of interference are received. PMA must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. This authority will terminate automatically upon cessation of the unregistered operation by the Cuban Station.

If not terminated earlier as discussed above, this authority expires on **July 7, 2013**. Any request for further extension of this authority must be accompanied by the results of field strength measurements which indicate continued interference to the reception of Station WTLN caused by the non-compliant operation of the Cuban station.

Sincerely,

Joseph Szczesny, Engineer
