Dear Mr. Paper:

This is in reference to the request filed December 7, 2012. Reed requests further extension of the STA granted on May 18, 2010, to operate Station WHNR with emergency antenna facilities pursuant to Section 73.1680. In support of the request, Reed states that all repairs to the antenna system (including fallen tower) have not been completed, but Reed anticipates all repairs should be completed after ownership of the station is updated later this year.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. WHNR is licensed for operation on 1360 kHz with 5 kilowatts daytime and 2.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Commission when licensed operation is restored.² Reed must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 10, 2013**. Failure to complete all necessary repairs to the antenna system before the expiration date above may lead to a denial of any further STA requests.

Sincerely,

Joseph Szczesny, Engineer
