Subject: KMRW(FM) Pullman Modification of Permit - Population Figure Correction
Attachments: Exhibit 17 KMRW Minor Modification Update 2013-02-18-c.pdf

Art:

This is to follow-up on my voice mail message, in response to your recent call about the minor modification of permit application on file for KMRW(FM), Pullman, WA in FCC File No. BMPED-20121207AAE. As you pointed out, there is a discrepancy in the 60 dBu contour population figures for the overlap area as discussed in Exhibit 17 (page 2, 3rd paragraph) and Table 17-1.

The engineer who prepared the application has confirmed that the correct population figures is 59,364 (using 2010 census data), as shown in Table 17-1. (The 51,741 figure is incorrect; it was calculated using 2000 census data and was inadvertently not updated along with the rest of the data.) A corrected version of the exhibit is attached.

Please let me know if this email is sufficient to note the correction and continue with processing of the application, or if you would like a formal amendment filed to the application to replace the exhibit. If so, we'll work to get that on file quickly.

Thanks,
Barry
