Re: KXPC-FM, Lebanon, Oregon
Educational Media Foundation
Facility Identification Number: 61987
Special Temporary Authorization
BESTA-20130225ADC

Dear Counsel:

This is in reference to the request filed February 25, 2013, on behalf of Educational Media Foundation ("EMF"). EMF requests a third extension of the special temporary authority ("STA") granted on March 29, 2011, and modified on May 25, 2011, for operation of Station KXPC-FM with temporary facilities.¹ In support of the request, EMF states that it is currently awaiting grant of construction permit application BPED-20130124ADE. EMF also notes that another station, KNRQ, must move before it can complete its modifications.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KXPC-FM is licensed to Lebanon, Oregon, for operation on Channel 279C (103.7 MHz) with effective radiated power ("ERP") of 90 kilowatts (H&V) and antenna height above average terrain ("HAAT") of 624 meters. Construction Permit BMPED-20110302ACD authorizes relocation of the station to Harrisburg, a downgrade to Class C0, relocation of the transmitter and operation with ERP of 100 kW and HAAT of 310 meters. Construction permit application BPED-20130124ADE proposes a change in transmitter site and community of license, to Harrisburg, OR.

Our review indicates that EMF has taken steps to restoring permanent operations. Therefore, extension of STA IS HEREBY GRANTED. Station KXPC-FM may continue to operate with the following facilities:

Geographic coordinates:	44° 28' 59" N, 122° 34' 55" W (NAD 1927)
Channel	279 (103.7 MHz)
Effective radiated power:	1.45 kilowatts (H&V)
Antenna height:	
above ground:	38 meters
above mean sea level:	1245 meters
above average terrain:	741 meters

EMF must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's guidelines. *See* 47 CFR § 1.1310. Upon commencement of program test operations by KXPC-FM pursuant to a construction permit, EMF shall notify the Commission of that fact.

This authority expires on September 1, 2013.

Sincerely,

Dale Bickel
Senior Engineer
