In re: W243BB, Holly Springs, MS
BPFT-20130219ABH
Facility ID # 146950

Dear Applicant:

This refers to the above-captioned FM translator application for W243BB, Holly Springs, Mississippi.

An engineering study of the application reveals that it is in violation of 47 C.F.R. § 74.1204(a) and (e) with respect to co-channel translator primary station WWWN(FM), Holly Springs, MS. The predicted 54 dBu interference contour overlaps the protected 60 dBu contour of WWWN(FM), BLH-20121203BJQ. Section 74.1204(e) of the Commission's rules states § 74.1204(a) does "not apply to overlap between a proposed fill-in FM translator station and its primary station operating on a first, second or third adjacent channel, *provided* that such operation may not result in interference to the primary station within its principal community." The proposed interfering contour completely encompasses the city of license of the primary station therefore, the application will be dismissed.

In light of the above, the application BPFT-20130219ABH filed by Gerald W. Hunt is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
