Re: Clear Channel Broadcasting Licenses, Inc.
KAKC (AM), Tulsa, Oklahoma
Facility Identification Number: 11939
Special Temporary Authority (STA)
BESTA- 20130111ABR

Dear Mr. Langham:

This is in reference to the request filed January 11, 2013, on behalf of Clear Channel Broadcasting Licenses, Inc. (CCBL). CCBL requests extension of the STA granted on July 11, 2012, to operate Station KAKC with a temporary non-directional antenna and reduced power.¹ In support of the request, CCBL states that it seeks extension pending action on the pending license application BMML-20120921AEZ.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

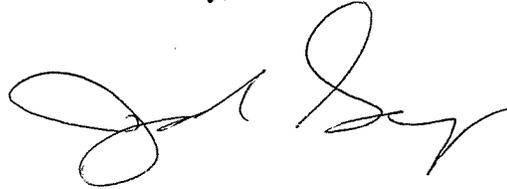

Accordingly, the request for STA IS HEREBY GRANTED, with modification as discussed above. Station KAKC may operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with a temporary non-irectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.25 kilowatt nighttime also is authorized, only as necessary to facilitate the planned maintenance work. Following completion of necessary modifications, adjustments and measurements, operation is authorized with the substantially adjusted daytime and nighttime directional patterns and powers, pending the submission of an application for modification of license pursuant to Section 73.151(c). During this latter mode of operation, operating parameters must be maintained within

¹ KAKC is licensed for operation on 1300 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

$\pm 5\%$ current ratios and $\pm 3^\circ$ phase indications of the MOM-derived operating parameters, which must be posted with the station license along with a copy of this letter. It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for modification of license will be filed prior to the expiration date below. CCBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **August 18, 2013**.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Szczesny', written in a cursive style.
