Request for Experimental Authority

Dear Licensee:

The staff has under consideration your request, received February 1, 2013, for experimental authority pursuant to Section 73.1510 of the Commission's Rules¹ to permit Station WYLL(AM) to operate with modulation dependent carrier level ("MDCL") technology. The request states that Station WYLL(AM) will use the Amplitude Modulation Comanding ("AMC") MDCL algorithm with its licensed Harris Corporation transmitter to evaluate the effects of the use of MDCL technology on station performance, audio quality and coverage, as well as the resulting cost savings achieved.

By *Public Notice* on September 13, 2011, the Media Bureau announced that it would routinely grant requests for experimental authority in order to allow AM stations to evaluate MDCL technology.²

Accordingly, the requested experimental authority described above IS HEREBY GRANTED. This experimental authority expires on **March 28, 2014**. Any request for extension of this authority should be filed at least 30 days prior to the expiration date.

Sincerely,

Susan N. Crawford
Assistant Chief
Audio Division
Media Bureau
