Re: WLJV(AM), Boynton Beach, FL
Facility Identification Number: 4341
Actualidad 1040AM Licensee, LLC
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed March 28, 2013, on behalf of Actualidad 1040AM Licensee, LLC ("Actualidad"). Actualidad requests special temporary authority ("STA") pursuant to Section 73.1615 of the Commission's Rules to operate with reduced power or with parameters at variance from licensed tolerances while maintaining monitoring point field strengths within licensed limits.¹

In support of the request, Actualidad states that it recently upgraded the WLJV(AM) antenna tuning units and made other technical improvements and has elected to relicense its facility using method of moments procedure. In order to do so, Actualidad asserts that WLJV(AM) must temporarily operate at reduced power in directional mode, or 25% power in nondirectional mode as necessary to protect workers near the towers and facilitate the measurements needed for the method of moments proof.

Accordingly, the request for STA IS HEREBY GRANTED. Station WLJV(AM) may operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. Operation during daytime hours with a nondirectional antenna and reduced power not to exceed 6.25 kilowatts and operation during nighttime hours with a nondirectional antenna and reduced power not to exceed 0.275 kilowatts is authorized. It will be necessary to further reduce power or cease operation if complaints of interference are

¹ WLJV(AM) is licensed for operation on 1040 kHz with 25 kilowatts daytime and 1.1 kilowatts nighttime, employing different directional antenna patterns during daytime and nighttime hours (DA-2-U).

received. Actualidad must notify the Commission when licensed operation is restored.² Actualidad must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 30, 2013**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
