Re: WLGC-FM, Greenup, Kentucky
Greenup County Broadcasting, Inc.
Facility Identification Number: 25224
Special Temporary Authority
BESTA-20130419AAU

Dear Counsel:

This is in reference to the request filed April 19, 2013, on behalf of Greenup County Broadcasting, Inc. ("GCB"). GCB requests a second extension of the special temporary authority ("STA") granted July 18, 2012 to operate Station WLGC-FM with reduced power.¹ In support of the extension request, GCB states that the replacement transmitter has arrived but is not yet delivered to the transmitter site, as recent weather conditions have made the road to the transmitter site unsafe.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

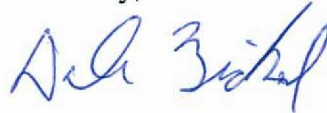

¹ WLGC-FM is licensed for operation on Channel 289C3 (105.7 MHz) with effective radiated power of 12.5 kilowatts (H&V) and antenna height above average terrain of 142 meters.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation, but that additional time is needed to complete the work..

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WLGC-FM may continue to operate with reduced power. GCB must notify the Commission when licensed operation is restored. GCB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 24, 2013**.

Sincerely,

Dale Bickel
