Re: WYLD(AM), New Orleans, Louisiana
Facility Identification Number: 60707
Clear Channel Broadcasting Licenses, Inc.
Special Temporary Authority (STA)
BESTA- 20130328ALG

Dear Mr. Langham:

This is in reference to the request filed on March 28, 2013. Clear Channel Broadcasting Licenses, Inc. (CCBL) requests further extension of the STA originally granted on October 14, 2005, and modified on March 9, 2012, to operate Station WYLD with emergency antenna facilities pursuant to Section 73.1680 of the Commission's rules.¹ In support of the request, CCBL states that a Method of Moments (MOM) proof will be filed with the Commission after all antenna system problems have been resolved.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

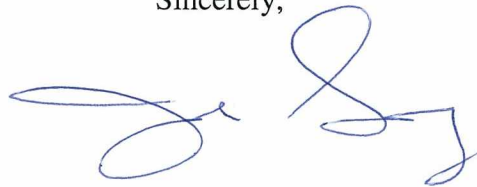

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WYLD may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Following completion of necessary measurements and adjustments, Station WYLD may operate with its substantially adjusted daytime and nighttime

¹ WYLD is licensed for operation on 940 kHz with 10 kilowatts daytime and 0.5 kilowatt nighttime, employing different directional antenna patterns during daytime and nighttime hours. (DA-2-U).

directional patterns. During this mode of operation, operating parameters shall be maintained within $\pm 3^\circ$ phase indications and $\pm 5\%$ current ratios from the MOM-derived operating parameters, which shall be posted with the station license along with a copy of this letter. It will be necessary to further reduce power or cease operation if complaints of interference are received. Failure to file an acceptable application for modification of license on FCC Form 302 with a MOM proof prior to the expiration date below may lead to a denial of any subsequent extension requests and cancellation of the original STA. CCBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 23, 2013**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Szczesny', written in a cursive style.
