Re: WRFM (AM), Muncie, Indiana
Facility Identification Number: 1724
Indiana Community Radio Corporation (ICRC)
Special Temporary Authorization (STA)
BESTA-20130402AAI

Dear Mr. Hensley:

This is in reference to the request filed on April 2, 2013. ICRC requests further extension of the STA originally granted on September 2, 1999, and modified on September 16, 2002, to operate from a site other than the licensed site, with reduced power and employing a temporary, nondirectional antenna.¹ In support of the request, ICRC states that it has been unable to locate a suitable site (in order to file an FCC Form 301 application for construction permit to modify the licensed facility).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that ICRC did not provide any new information to explain why an FCC Form 301 application was not filed. As a result, we will grant this extension, but no further requests for extension will be considered until after an acceptable FCC Form 301 application has been filed. Accordingly, the request for STA IS HEREBY GRANTED. Station WRFM may

¹ WRFM is licensed for operation on 990 kHz with 0.250 kW day and 0.001 kW night, employing different directional antenna patterns.

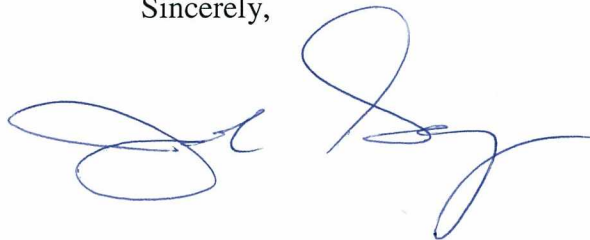

continue to operate with the following facilities:

Transmitter site	3908 West 30th Street, Muncie, IN
Coordinates:	40° 09' 35" N, 85° 25' 55" W (NAD27)
Frequency:	990 kHz
Operating hours:	Unlimited
Operating power:	not to exceed 0.062 kW daytime, 0.001 kW nighttime
Antenna:	existing tower, non-directional (folded unipole)

It will be necessary to further reduce power or cease operation if complaints of interference are received. ICRC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. Failure to file an acceptable FCC Form 301 application before the expiration date shown below will result in a denial of any future extension request and cancellation of the original STA.

This authority expires on **July 25, 2013**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Szczesny', with a large loop at the end.
