Subject: Amendment for KRVD-LP - BMPDVL-20110729AFW

Ms. Stewart, I am writing in reference to the amendment that was filed on May 31, 2013, by Venture Technologies Group, LLC. To the pending proposal as subject above in reply to a 30 day letter which was sent due to Mexico objection to their above mentioned proposal.

Below, I have imported the first part of the engineering exhibit that is attached to the amendment for your reference:

Form 346, Exhibit 13

Engineering Statement and Interference Analysis

This technical statement supports this application to amend BMPDVL-20110729AFW for KRVD-LD, a digital construction permit on Channel 5 in Banning, CA (Facility ID 128327).

This amendment is submitted pursuant to the FCC letter dated May 2, 2013 that states Mexico has objected to the proposal because of possible interference to XHAQ-TV, see Exhibit 2 attachment. Because of this request for an amendment to protect XHAQ-TV, **the Applicant contacted the International Bureau to determine to what degree it needs to limit the proposed contour toward Mexico so that further coordination is not required. The Applicant received instruction to amend application “so that the F(50,90) 43 dBu contour does not extend between 112 degrees and 175 degrees, which is the entire arc from our transmitter site to the entire Mexican border within 400 km of our transmitter site.”** Therefore, the Applicant proposes to modify the antenna make, model and orientation to limit its coverage toward Mexico in every direction which makes the proposed facility immediately grantable, see Attachment A.

Please reference the bold/underlined part of the exhibit, please ask the licensee to forward the instructions that they received from our International Bureau which will show the International Bureau Employee who provided these instructions.

It would be very much appreciated, if the requested information can be received by close of business on June 14, 2013.

Thanks, Ron Graser
