Re: WDLG(FM), Thomasville, Alabama
Divine Word Communications
Facility Identification Number: 86328
Special Temporary Authority
BESTA-20130605ACI

Dear Counsel:

This is in reference to the request filed June 5, 2013, on behalf of Divine Word Communications ("DWC"). DWC requests a third extension of the special temporary authority ("STA") granted on November 1, 2011, to operate Station WDLG with temporary facilities.¹ DWG's construction permit application BPED-20120313AEE, for relocation of the transmitter to a new, permanent site, was granted January 22, 2013. The licensee hopes to have the new facility constructed by the end of 2013.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that DWC is making progress toward restoring permanent, licensed operation. Thus, extension of STA is warranted.

¹ WDLG is licensed for operation on Channel 211A (90.1 MHz) with effective radiated power of 0.5 kilowatt (H&V) and antenna height above average terrain of 76 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WDLG may continue to operate with the following facilities:

Geographic coordinates:	31° 43' 43" N, 87° 45' 04" W (NAD 1927)
Channel	211 (90.1 MHz)
Effective radiated power:	0.05 kilowatt (H&V)
Antenna height:	
above ground:	56 meters
above mean sea level:	202 meters
above average terrain:	99 meters

DWC must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 10, 2013**.

Sincerely,

Dale Bickel
Senior Engineer
