Re: WASG(AM), Daphne, Alabama
Facility Identification Number: 51141
Alabama Radio Corporation (ARC)
Special Temporary Authorization (STA)
BESTA-20130529ALN

Dear Mr. Gutmann:

This is in reference to the request filed on May 29, 2013. ARC requests an extension of the STA granted on November 6, 2012, for the operation of Station WASG with temporary facilities.¹ In support of the request, ARC plans to file an FCC Form 301 application to construction a new tower to replace the dismantled licensed tower.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

We note that the previous STA expired on May 6, 2013. Our review indicates that the circumstances presented warrant grant of STA in order to provide for service to the public, and that the requested STA facilities are the same as were previously authorized. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, it will be considered as a request for a new STA; and the authority granted will not cover the period between the expiration of the prior STA and the filing of the instant request.

¹ WASG is licensed for operation on 550 kHz with 2.5 kilowatts daytime and 0.19 kilowatt nighttime, employing a nondirectional antenna (ND-1-U).

Accordingly, the request for STA extension IS HEREBY GRANTED. Station WASG may operate from its licensed site with a temporary tower and reduced power. It will be necessary to further reduce power or cease operation if complaints of interference are received. ARC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between May 6, 2013, and May 29, 2013, and is without prejudice as to whatever action the Commission may take with respect to operation of Station WASG during the foregoing period.

This authority expires on **December 21, 2013**.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke.
