Re: WXVU (FM), Villanova, PA
Villanova University
Facility Identification Number: 70229
Special Temporary Authority
BESTA-20130625AAD

Dear Counsel:

This is in reference to the request filed June 25, 2013, on behalf of Villanova University ("VU"). VU requests an extension of the special temporary authority ("STA") granted January 13, 2013 to operate Station WXVU with temporary facilities.¹ In support of the extension request, VU demonstrates that it has made progress toward purchasing new equipment and reconstructing the antenna supporting structure. Resumption of licensed operation is anticipated in the next few months.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WXVU is licensed for operation on Channel 206A (89.1 MHz) with an effective radiated power of 0.1 kilowatts (V only, directional) and an antenna height above average terrain (HAAT) of 85 meters.

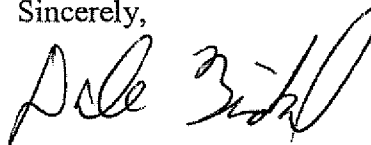

Our review indicates that the licensee is making steady progress toward restoring licensed operation. Thus, extension of STA is warranted. Accordingly, the request for STA IS HEREBY GRANTED. Station WXVU may continue to operate with the following facilities:

Geographic coordinates:	40°01'58" N, 75° 20' 15" W (NAD 1927)
Channel:	206A (89.1 MHz)
Effective radiated power:	0.099 kilowatts (H&V)
Directional antenna:	CDBS Antenna ID 111542, 290° rotation
Antenna height:	
above ground:	19 meters
above mean sea level:	149 meters
above average terrain:	72 meters

VU must notify the Commission when licensed operation is restored. VU must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines, and shall post signs at entrances to the roof which describe the nature of the hazard. See 47 CFR § 1.1310.

This authority expires on **December 24, 2013**.

Sincerely,

Dale Bickel,
Senior Engineer
