Re: Radio License Holding CBC, LLC (RLH)
KKOH(AM), Reno, Nevada
Facility Identification Number: 11236
Special Temporary Authority (STA)
BESTA - 20130605ABW

Dear Mr. Lipp:

This is in reference to the request filed on June 5, 2013. RLH requests an extension of the STA originally granted on March 7, 2013, to operate station KKOH(AM) with parameters at variance from license values and/or reduced power while maintaining monitor points within license limits.¹ In support of the request, RLH states that it is in the process of completing a proof to be filed in an FCC Form 302 license application in order to resume licensed operations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for STA IS HEREBY GRANTED. Station KKOH(AM) may operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. RLH must notify the Commission when licensed operation is restored.² RLH must use whatever means are necessary to protect

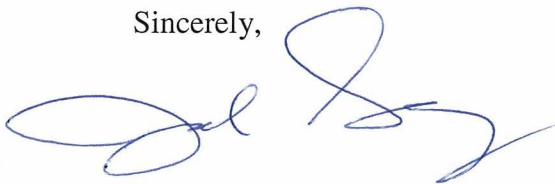

¹ KKOH(AM) is licensed for operation on 780 kHz with a non-directional daytime power of 50 kilowatts, and a nighttime directional power of 50 kilowatts (DAN-U).

² See 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b)

workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **January 2, 2014**.
