> Re: Salem Media of New York, LLC WMCA(AM), New York, New York Facility Identification Number: 58626 Special Temporary Authority

Dear Counsel:

This is in reference to the request filed August 16, 2013, on behalf of Salem Media of New York, LLC ("Salem"). Station WMCA(AM) is currently authorized by STA (BESTA-20130328AEN) to operate with emergency antenna facilities pursuant to Section 73.1680. Specifically, WMCA(AM) is authorized to operate nondiretionally with a power of 1.25 kilowatts during daytime and nighttime hours. In its latest STA request, Salem states that the construction portion of the restoration project is nearing completion after the severe damage caused by Hurricane Sandy. The station plans to verify the performance of the directional patterns and license WMCA(AM) using the Method of Moments proofing procedures. Therefore, Salem requests STA to operate with the current emergency antenna facilities or with operating parameters derived by Moment Method computer modeling pending preparation and subsequent Commission processing of an Application for License.¹

Accordingly, the request for STA IS HEREBY GRANTED. Station WMCA(AM) may operate nondirectionally with a power of 1.25 kilowatts during daytime and nighttime hours, or with operating parameters derived by Moment Method computer modeling. In addition, the WMCA(AM) STA extension (BESTA-20130328AEN) which was granted on April 18, 2013 IS HEREBY TERMINATED. It will be necessary to further reduce power or cease operation if complaints of interference are received. Salem must notify the Commission when licensed operation is restored.² Salem must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

¹ WMCA(AM) is licensed for operation on 570 kHz with 5 kilowatts, unlimited hours, employing the same directional pattern daytime and nighttime (DA-1-U).

² See 47 CFR §§ 73.45(c), 73.51, 73.54, 73.61(b)

This authority expires on November 14, 2013.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Lerome Manarcheec
