Larry G. Fuss, President Delta Radio Network, LLC 9408 Grand Gate Street Las Vegas, Nevada 89143

Re: Delta Radio Network, LLC (DRN)

WNIX (AM), Greenville, Mississippi Facility Identification Number: 66328 Special Temporary Authority (STA)

BESTA-20130717AOW

Dear Mr. Fuss:

This is in reference to the request filed on July 17, 2013. DRN requests further extension of the STA granted on December 27, 2011, as modified, to operate Station WNIX with the nighttime non-directional antenna authorized in the Construction Permit (BMP-20130422ADQ). In support of the request, DRN states that it intends to complete the modifications, dismantle the two unused licensed nighttime towers, and file an FCC Form 302 license application in the near future.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED as modified. Station WNIX may operate during nighttime hours using the daytime licensed tower (registration # 1042312) using the power level authorized in the permit (0.055 kW), and will continue using the licensed daytime power of 1 kW until all necessary permit modifications have been

<sup>&</sup>lt;sup>1</sup> WNIX is licensed for operation on 1330 kHz with 1 kW day (ND) and 0.5 kW night (DA), and Construction Permit BMP-20130422ADQ authorizes an increase in daytime power to 3.8 kW, and a reduction in nighttime power to 0055 kW non-directional (using existing daytime tower and dismantling two other existing nighttime towers).

completed. It will be necessary to further reduce power or cease operation if complaints of interference are received. DRN must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **November 22, 2013**. Failure to file an acceptable FCC Form 302 license application before the expiration date noted above may lead to a denial of any further request for STA.

Sincerely,

Joseph Szczesny, Engineer
