Re:

Andala Enterprises, Inc. WNWF(AM), Destin, FL

Facility ID No. 72803

File No. BMP-20130419AAK

Dear Mr. Ralls:

This is in reference to above-captioned minor change application to change frequency from 1120 to 1140 kHz, increase tower height and daytime power from 1 kW to 3 kW, add a 2.4 kW critical hours facility, and add a 0.012 kW nighttime facility for station WNWF(AM).

A preliminary review of the application reveals that the proposed efficiency of 287.7 mV/m/km/kW is incorrect, and the correct efficiency should be 269 mV/m/km/kW based upon the proposed deficient ground system. However, an efficiency of 269 mV/m/km/kW would be unacceptable because it falls below the required minimum efficiency of 282 mV/m/km/kW for Class D stations, as specified in Section 73. 189 of the Commission's rules.

Further action on the subject application will be withheld for a period of thirty (30) days from the date of this letter in order to allow time to file a curative amendment. Failure to respond or amend within this time period will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

Śon Nguyen

Supervisory Engineer

Audio Division Media Bureau
