**Request for Experimental Authority**

Dear Licensee:

The staff has under consideration your request, received July 25, 2013, for experimental authority to permit Station KPRZ(AM) to operate with modulation dependent carrier level ("MDCL") control technology. The request states that Station KPRZ(AM) will use the Amplitude Modulation Companding ("AMC") MDCL algorithm with its licensed Harris Corporation main transmitter to evaluate the effects of the use of MDCL control technology on station performance, audio quality and coverage, as well as the resulting cost savings achieved.

By *Public Notice* on September 13, 2011, the Media Bureau announced that it would routinely grant requests for experimental authority in order to allow AM stations to evaluate MDCL technology.<sup>1</sup>

Accordingly, pursuant to Section 5.203 of the Commission's Rules,<sup>2</sup> the requested experimental authority described above IS HEREBY GRANTED. This experimental authority expires on **October 22, 2014**. Any request for extension of this authority should be filed at least 30 days prior to the expiration date.

Sincerely,

Susan N. Crawford  
Assistant Chief  
Audio Division  
Media Bureau

<sup>1</sup> See "Media Bureau to Permit Use of Energy-Saving Transmitter Technology by AM Stations," Public Notice, 26 FCC Rcd 12910 (MB 2011). At the time of its release, this *Public Notice* stated that requests for experimental authorizations to evaluate MDCL control technologies would be authorized pursuant to Section 73.1510 of the Commission's Rules. Effective May 29, 2013, Section 73.1510 of the Commission's Rules was deleted, and experimental authorizations for licensed broadcast stations are now governed by Section 5.203 of the Commission's Rules.

<sup>2</sup> 47 C.F.R. § 5.203.
