Re: W236CA (FX), Wake Forest, NC
Radio Training Network, Inc.
Facility Identification Number: 87686
Special Temporary Authority (STA)
BSTA-20131030AGG

Dear Counsel:

This is in reference to the request filed November 13, 2013, on behalf of Radio Training Network, Inc. ("RTN"). RTN explains that translator W236CA went silent to resolve cochannel interference, that while the station was silent it lost its position on the tower, and that the translator has since been able to resume operation on October 30, 2013 at reduced power and antenna height.¹ RTN requests an STA to permit the reduced operations to continue.

We conclude that an STA is warranted in this instance. The request for STA IS HEREBY GRANTED. Translator W236CA may operate from its licensed site with the following facilities:

Channel	236D (95.1 MHz)
Effective radiated power:	0.003 kilowatts (V only)
Antenna height:	
above ground:	9 meters
above mean sea level:	124 meters
Above average terrain:	21 meters

RTN must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **May 20, 2014**.

Sincerely,

Dale Bickel
Senior Engineer
Audio Division
Media Bureau

cc: Radio Training Network, Inc.

¹ W236CA holds construction permit BPFT-20130403ABD for a different transmitter site.
