Re: Yavapai Broadcasting Corporation
KVNA (AM), Flagstaff, Arizona
Facility Identification Number: 68567
Special Temporary Authority
BESTA-20130624ABG

Dear Mr. Campbell:

This is in reference to the request filed June 24, 2013, on behalf of Yavapai Broadcasting Corporation ("YBC"). YBC requests further extension of the special temporary authority ("STA") granted on December 21, 2012, to operate Station KVNA with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, YBC states that it has located a potential site on an existing tower and has reached a verbal agreement. The parties continue to find a resolution for the engineering issue. Circumstances beyond YBC's control involving the tower owner and a third party continue to delay finalization of a lease agreement, but appear to be nearing conclusion.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KVNA is licensed for operation on 600 kHz with 1 kilowatt daytime and 0.048 kilowatt nighttime, employing a nondirectional antenna.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for STA IS HEREBY GRANTED. Station KVNA may continue to operate with the following facilities:

Geographic coordinates: 35° 13' 43" N, 111° 34' 05" W (NAD 1927)

Frequency: 600kHz

Hours of operation: Unlimited

Operating power: Not to exceed 1 kW daytime, 0.048 kW nighttime

Antenna: Long wire

It will be necessary to reduce power or cease operation if complaints of interference are received. YBC must notify the Commission when licensed operation is restored.² YBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commissions exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **December 21, 2013**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J Kong', is positioned above the typed name.

Jimmy Kong, Engineer
