Re: Public Broadcasting of Colorado, Inc. (PBC)
KCFC(AM), Boulder, Colorado
Facility Identification Number: 70405
Special Temporary Authority (STA)
BESTA- 20140318ACK

Dear Mr. Keane:

This is in reference to the request filed on March 18, 2014. PBC requests a fifth extension of the STA originally granted on June 22, 2011, to operate Station KCFC with temporary facilities due to loss of the licensed site.¹ In support of the request, PBC states that a second site was found to be problematic, and that it continues to consider options for a new permanent site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KCFC may continue to operate with the following facilities:

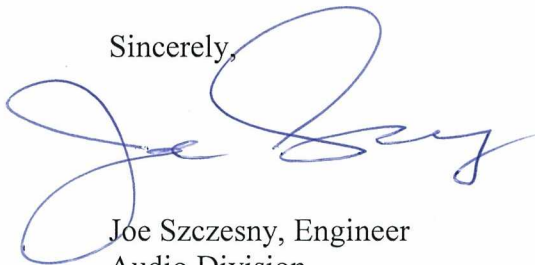

¹ KCFC is licensed for ND operation on 1490 kHz with 1 kW (day and night).

Transmitter site: Existing tower of station KVCU(AM), Boulder, CO (ID# 48965)
Geographic coordinates: 39° 57' 53" N, 105° 14' 07" W (NAD 1927)
Frequency: 1490 KHz
Hours of operation: Unlimited
Operating power: Not to exceed 0.32 kW
Antenna type: Non-directional
Radiator height: 112.7° (63 meters)
Antenna efficiency: 320.4 mV/m/km/kW
Overall height: 65.7 meters
ASRN: 1033690

It will be necessary to further reduce power or cease operation if complaints of interference are received. PBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. We anticipate that PBC will either file an FCC Form 301 application to modify the licensed facility before the expiration date shown below, or specify what new steps have been taken to show that substantial progress has been made towards restoration of licensed operations.

This authority expires on **October 9, 2014**.

Sincerely,

Joe Szczesny, Engineer
