Re: W266AW (FX), North Adams, MA
University of Massachusetts
Facility Identification Number: 142212
Special Temporary Authority (STA)
BSTA-20140409AAH

Dear Counsel:

This is in reference to the request filed April 9, 2014, on behalf of the University of Massachusetts ("University"). University explains that the tower supporting W266AW collapsed on March 30, 2014. The station has since been able to return to the air with an emergency antenna mounted atop an adjacent building, pursuant to Section 73.1680 of the Commission's rules. University requests an STA to continue such operation until the tower can be rebuilt.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna.

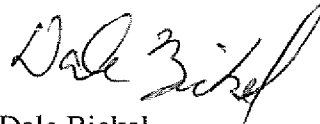

Accordingly, the request for STA IS HEREBY GRANTED. Station W266AW may operate from its licensed site with the following facilities:

Channel	266D (101.1 MHz)
Effective radiated power:	0.010 kilowatts (V)
Antenna height:	
above ground:	5 meters
above mean sea level:	624 meters
Above average terrain:	124 meters

University must notify the Commission when licensed operation is restored. University must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **October 11, 2014**.

Sincerely,

A handwritten signature in black ink, appearing to read "Dale Bickel". The signature is fluid and cursive, with the first name "Dale" and last name "Bickel" clearly distinguishable.

Dale Bickel
