Re: IHR Educational Broadcasting
KIHM(AM), Reno, Nevada
Facility Identification Number: 53707
Construction Permit: BP-20130514ADB
License Application: BMML-20140430ACZ
Program Test Authority

Dear Mr. Kelly:

This is in reference to the above-captioned license application and your request for program test authority for station KIHM(AM).

Authority is granted KIHM(AM) to conduct program tests in accordance with Construction Permit BP-20130514ADB and Section 73.1620 of the Commission's rules on 920 kHz with a daytime nominal power of 4.8 kilowatts and a nighttime nominal power of 0.85 kilowatts. Program tests are authorized with a daytime antenna input power of 4.8 kilowatts (antenna current of 9.8 amperes) and a nighttime antenna input power of 0.92 kilowatts (common point current of 4.28 amperes), and with the antenna monitor parameters shown on Form 302-AM.

A preliminary engineering study reveals that condition #6 of the construction permit was not fulfilled. The agreement between KIHM(AM) and KSGG(AM) concerning the responsibility of each station with regard to the installation and maintenance of the tower was not provided. Further KSGG(AM) had not measured its antenna resistance or filed a FCC Form 302 to return to direct measurement of power. This program test authority will expire on **September 12, 2014**.

Further action on the subject application will be withheld for thirty (30) days from the date of this letter in order to provide IHR Educational Broadcasting an opportunity to file a curative amendment. Failure to respond or file an amendment within this time period may result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

Son Nguyen,
Supervisory Engineer
