Larry G. Fuss, President Delta Radio Network, LLC 9408 Grand Gate Street Las Vegas, Nevada 89143

> Re: Delta Radio Network, LLC (DNR) WNIX(AM), Greenville, Mississippi Facility Identification Number: 66328 Special Temporary Authority (STA) BESTA-20140516AAP

Dear Mr. Fuss:

This is in reference to the request filed on May 16, 2014. DRN requests a fifth extension of the STA originally granted on December 27, 2011, as modified, to operate Station WNIX with the nighttime 0.055 kW ND antenna authorized in BMP-20130422ADQ due to problems with the nighttime directional antenna system and DRN's plan to replace it with a non-directional antenna.¹ In support of the request, DRN states that work on the transmitter continues.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

• Restoration of licensed facilities is complete and testing is underway;

• Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

• No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED as modified. Station WNIX may operate during nighttime hours using the daytime licensed tower (registration

¹ WNIX is licensed for operation on 1330 kHz with 1 kW day (ND) and 0.5 kW night (DA), and BMP-20130422ADQ authorizes an increase in daytime power to 3.8 kW, and a reduction in nighttime power to 0.055 kW using the existing daytime ND tower only (two other existing nighttime towers will be dismantled), and the permit expires on March 30, 2015.

1042312) using the power level authorized in the permit (0.055 kW), and will continue using the licensed daytime power of 1 kW until all necessary permit modifications have been completed. It will be necessary to further reduce power or cease operation if complaints of interference are received. DRN must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commissions exposure guidelines. See 47 CFR § 1.1310. We anticipate DNR will complete all required work before the expiration date shown below and file an FCC Form 302 license application to cover BMP-20130422ADQ (in order to resume licensed operations).

This authority expires on December 12, 2014.

Sincerely, Joseph Szczesny, Engineer Audio Division Media Bureau
