Facility ID Number: 160999  
Construction Permit: BNP-20071221ADK  
as modified by BMP-20121114AFG  
License File Number: BMML-20140617ABT  
Program Test Authority

Dear Ms Breslin:

This is in reference to the above-captioned license application and program test authority.

Authority is granted KDPP(AM) to conduct program tests of the daytime and nighttime antenna systems authorized in BMP-20121114AFG in accordance with Section 73.1620 of the Commission's Rules. KDPP(AM) would operate on 890 kHz with a nominal daytime power of 10 kilowatts and a nighttime nominal power of 0.48 kilowatts. Program tests are authorized with a daytime antenna input power of 10.53 kilowatts (antenna common point current of 14.51 amperes) and with a nighttime antenna input power of 0.518 kilowatts (antenna common point current of 3.22 amperes) and with the antenna monitor parameters shown on FCC Form 302-AM.

A preliminary review of the application reveals condition #3 has not been fulfilled because KTKZ(AM) and KMYC(AM) have not filed a FCC Form 302 to go to the direct measurement of power. We are still waiting for them to be filed by their respective licensees.

This program test authorization will expire on October 3, 2014.

Please resolve the issue raised in this letter within thirty (30) days from the date of this letter. Failure to respond within this time period may result in the dismissal of the application pursuant to Section 73.3568 of the rules.

Sincerely,

Edward Lubetzky  
Electronics Engineer
