Re: Actualidad 1040AM Licensee, LLC WLVJ(AM), Boynton Beach, FL Facility Identification Number: 4341 Special Temporary Authority BESTA- 20140623ABD

Dear Mr. Liberman:

This is in reference to the request filed on June 23, 2014. Actualidad requests a third extension of the STA originally granted on April 3, 2013, to operate with reduced power or with parameters at variance from licensed tolerances while maintaining monitoring point field strengths within licensed limits pursuant to Section 73.1615 of the Commission's Rules due to antenna system equipment modifications. In support of the request, Actualidad stated it is currently operating per method of moments proof parameters, and plans to file an FCC Form 302 application before the end of July in order to resume licensed operations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WLVJ(AM) is licensed for DA operation on 1040 kHz with 25 kW day and 1.1 kW night.

Accordingly, the request for continued extension of STA IS HEREBY GRANTED. Station WLVJ(AM) may operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. Operation during daytime hours with a non-directional antenna and reduced power not to exceed 6.25 kilowatts and operation during nighttime hours with a non-directional antenna and reduced power not to exceed 0.275 kilowatts is authorized. It will be necessary to further reduce power or cease operation if complaints of interference are received. Actualidad must notify the Commission when licensed operation is restored. Actualidad must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on September 18, 2014.

Sincerely,

Joe Szczesny, Engineer

Audio Division Media Bureau
