Re: WYLD(AM), New Orleans, Louisiana
Facility Identification Number: 60707
Clear Channel Broadcasting Licenses, Inc.
(CCBL)
Special Temporary Authority (STA)
BESTA- 20140626ABC

Dear Mr. Langham:

This is in reference to the request filed on June 26, 2014. CCBL requests further extension of the STA originally granted on October 14, 2005, and modified on March 9, 2012, to operate Station WYLD with emergency antenna facilities pursuant to Section 73.1680 of the Commission's rules due to hurricane damage.¹ In support of the request, CCBL states it is preparing to complete a proof and then file an FCC Form 302 application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Although CCBL indicated this request was not timely filed due to an oversight, we noted

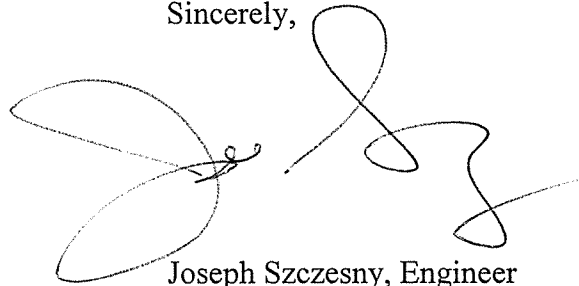

¹ WYLD is licensed for DA operation on 940 kHz with 10 kW day and 0.5 kW night.

an additional eight months has passed since the last extension expired, therefore we will grant an additional reduced period of time to allow CCBL to file the required FCC Form 302 license application in order to resume licensed operations.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WYLD may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Following completion of necessary measurements and adjustments, Station WYLD may operate with its substantially adjusted daytime and nighttime directional patterns. During this mode of operation, operating parameters shall be maintained within $\pm 3^\circ$ phase indications and $\pm 5\%$ current ratios from the MOM-derived operating parameters, which shall be posted with the station license along with a copy of this letter. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 23, 2014**.

Sincerely,

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke at the end.
