Program Test Authority

Dear Applicant:

This letter is in reference to KVMO's request for program test authority ("PTA") filed July 21, 2014 and the simultaneously filed application for license to cover Construction Permit BPH-20130625ACY referenced above.

This request is filed pursuant to a special operating condition contained in KVMO's construction permit BPH-20130625ACY. The condition states that a request for program test authority must be filed if the antenna to be used is not a Jampro "Double V" (EPA Type 2), three sectioned, 0.5 wavelength spaced antenna. In its request, KVMO is proposing to use a Shively 6600-2R-HW, two sectioned, 0.5 wavelength spaced antenna in order to show compliance with the special operating condition.

Upon review of KVMO's request, we find that compliance with the radiofrequency electromagnetic field limit would be maintained if the proposed Shively 6600-2R-HW, two sectioned, 0.5 wavelength spaced antenna was to be used. Accordingly, Automatic Program Test Authority IS HEREBY REINSTATED. Automatic program test authority may commence pursuant to 47 C.F.R. § 73.1620.

Sincerely,

Rodolfo F. Bonacci
