**Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Washington, DC 20554**

Secretary Dortch,

In accordance with the Code of Federal Regulations Title 47 - 73.1560, paragraph (d), KAOS in Olympia, Washington continues to operate at 25% power (250 watts transmitter output) due to the repairs to our transmitter not being completed. We have received word from the factory representatives that the repairs to our transmitter have now been completed and the unit is scheduled to be returned to KAOS during the week of January 27th.

The repair process and the lower power output began on Wednesday November 20, 2013. We expect to reinstall the unit and return to full power within the next 30 days. I will follow up with an additional written notification on the day we return to our authorized power.

Respectfully,

**Jerry Drummond
