Re: GB Enterprises Communications Corp.  
WHNR(AM), Cypress Gardens, Florida  
Facility Identification Number: 21766  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed September 9, 2014, on behalf of GB Enterprises Communications Corporation ("GBECC"). GBECC requests special temporary authority ("STA") to operate Station WHNR(AM) with emergency antenna facilities pursuant to Section 73.1680.<sup>1</sup> In support of the request, GBECC states as explained in its initial STA request, one of three towers used by the station had fallen down and had not been restored to operational status. The repair of the tower and the restoration of the station to operation in accordance with the parameters of its license were further complicated by a state court's placement of the station and then GB itself into a receivership. Therefore, GBECC is requesting STA with emergency antenna facilities in order to get the station back on the air.

Specifically, GBECC is requesting an STA to operate with technical parameters that are identical to the parameters of the STA requested by GBECC in April of 2010. In addition, the station has been silent since September 17, 2013 and must commence broadcast operations before 12:01 a.m., September 18, 2014 or its broadcast license will automatically expire.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(1) provides that AM stations using an emergency nondirectional antenna in lieu of authorized directional facilities shall operate with power reduced to 25 percent or less of the nominal licensed power, or a higher power, not exceeding licensed power, while insuring that the radiated field strength does not exceed that authorized in any given azimuth.

---

<sup>1</sup> WHNR is licensed for operation on 1360 kHz with 5 kilowatts daytime and 2.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Our review indicates that the request complies with Section 73.1680.

Accordingly, the request for STA IS HEREBY GRANTED. Station WHNR(AM) may operate with an emergency nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.625 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. GBECC must notify the Commission when licensed operation is restored.<sup>2</sup> GBECC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 10, 2015**.

Notwithstanding the grant of this STA or the expiration date specified herein, the station's license will expire as a matter of law upon twelve consecutive months of silence. *See* Pub. Law No. 104-104, 110 Stat. 56, Section 403(1)(1996) and *Order, Silent Station Authorizations*, FCC 96-218 (released May 17, 1996). *See also Public Notice, Expedited Processing of Applications Filed by Silent Stations*, DA 96-818 (May 22, 1996). The licensee must notify the Audio Division immediately upon resumption of broadcasting.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

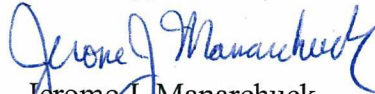

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or

---

<sup>2</sup> *See* 47 CFR §§ 73.45(c), 73.51, 73.61(b).

- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Jerome J. Manarchuck
