Re: Radio License Holding CBC, LLC (RLHC)

WKY (AM), Oklahoma City, Oklahoma Facility Identification Number: 23418 Special Temporary Authority (STA)

BESTA- 20140825ABT

Dear Mr. Lipp:

This is in reference to the request filed on August 25, 2014. CBC requests a sixth extension of the STA granted on January 25, 2011, to operate with an emergency ND antenna and reduced power due to relocation of the transmitting equipment and structural problems with the station's Franklin antenna.¹ In support of the request, RLHC states that in the past six month STA period it did not take any action towards restoration of licensed operations due to the extensive amount of work and high costs, and instead indicated that future action on MB Docket 13-249 would provide better options for resuming improved licensed operations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WKY is licensed for operation on 930 kHz with a 5 kW daytime ND antenna and nighttime DA antenna.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WKY may continue to operate with an emergency ND antenna using the 94.6° night tower #2(SW), and reduced power not to exceed 5 kW daytime and 1.25 kW nighttime, as necessary to facilitate all repairs. Operation also is authorized during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. RLHC must file an acceptable FCC Form 301 application to modify the facility when the MB Docket 13-249 has been adopted (or complete all repairs), and then notify the Commission when licensed operation is restored.² RLHC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on March 18, 2015.

Sincerely

Joseph Szczesny, Engineer

Audio Division Media Bureau
