Re: Radio Hawaii, Inc. (RHI)
KWAI(AM), Honolulu, Hawaii
Facility Identification Number: 54613
Special Temporary Authority (STA)
BESTA-20140925AFQ

Dear Mr. Peltzman:

This is in reference to the request filed on September 25, 2014. RHI requests a fifth extension of the STA granted on February 27, 2012, to operate Station KWAI with temporary facilities due to engineering parameter errors found on the last license.¹ In support of the request, RHI states that it plans to complete all required work shortly in order to file an FCC Form 302 license application.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KWAI may operate with the following facilities, with reduced power:

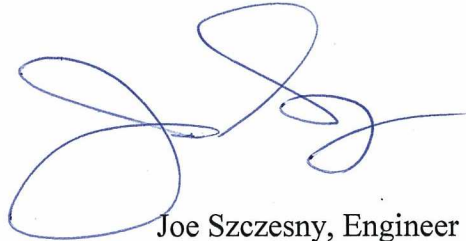

¹ KWAI is licensed for ND operation on 1080 kHz with 5 kW day and night, and BP-20120306ABL authorizes a change in coordinates, radiator height, and efficiency (in order to correct errors on the last license, BZ-19800228AD).

Geographic coordinates:	21° 19' 27"NL, 157° 52' 47"WL (NAD 1927)
Frequency:	1080 kHz
Hours of operation:	Unlimited
Operating power:	Not to exceed 5 kW
Antenna type:	ND, Existing tower
Radiator height:	77.5° (59.8 meters)
Antenna efficiency:	298 mV/m/km/kW
Overall height:	61 meters
ASRN:	1213943

It will be necessary to further reduce power or cease operation if complaints of interference are received. RHI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commissions exposure guidelines. See 47 CFR § 1.1310. We recommend that RHI complete all remaining work and file an FCC Form 302 application to cover the permit (BP-20120306ABL) before the expiration date shown below in order to resume licensed operations (since the permit also expires on that date).

This authority expires on **April 11, 2015**.

Sincerely,

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke extending to the right.

Joe Szczesny, Engineer
