WSYR(AM), Syracuse, New York  
Facility Identification Number: 48720  
Special Temporary Authority (STA)  
BESTA-20141017AAR

Dear Mr. Langham:

This is in reference to the request filed on October 17, 2014. CCL requests further extension of the STA granted on June 29, 2006, to operate Station WSYR with parameters at variance and/or reduced power while maintaining monitor points within licensed limits due to a series of repairs done on the tower foundations, ground system, sampling system, transmission lines, and phasing equipment.<sup>1</sup> In support of the request, CCL states that although the daytime pattern has been adjusted, additional time is required to adjust the nighttime pattern and take field measurements in order to resume licensed operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED. Station WSYR(AM) may continue to operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to

further reduce power or cease operation if complaints of interference are received. CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that CCL will complete all remaining work and file an FCC Form 302 application before the expiration date shown below.

This authority expires on **May 13, 2015**.
