Subject: RE: WWCN 73.207 correction

Julie, it's my read that the application was processed correctly since the application didn't specifically request removal of Section 73.215 status, even though it is fully spaced. (There have been instances where a fully spaced station wants to be licensed under Section 73.215 to facilitate a change by another station.) But since your email makes it clear that the licensee wants to be licensed under Section 73.207 and not 73.215, I have updated the database to remove the Section 73.215 designation. The change should show up in the database sometime tomorrow.

Subject: WWCN 73.207 correction

Ms. Dade, I am not sure who to talk to about this- we filed to delete the 73.215 status for WWCN back in October and the license modification was granted (BMLH-20141010ACQ). I have attached the revised license document as well which correctly does not indicate 73.215 contour protection.

However, the FCC CDBS engineering database still shows WWCN operating pursuant to 73.215. This reduces the protections afforded WWCN and should be corrected by the FCC. How would you recommend that we handle this? The CDBS engineering data is shown below. I've highlighted the erroneous field.

Thanks
