In Re: W280EM, Chicago, IL
Facility ID # 140763
BPFT-20150209ABD

Informal Objection

Dear Licensee:

This refers to interference complaints filed by Adams Radio of Northern Indiana, LLC filed February 2, 2015 and all related pleadings. These listener complaints, filed after January 20, 2015, must be resolved. Listener complaints can be filed at any time. The complaints allege that W280EM is interfering with the reception of WXR(D)FM, Crown Point, Indiana.

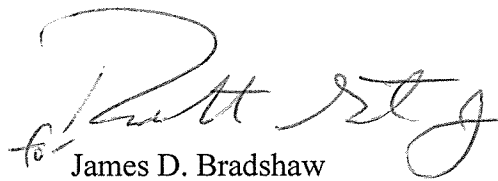

Pursuant to 47 C.F.R. § 74.1203, W280EM is required to eliminate any actual interference it causes. Therefore, it is necessary for W280EM to submit a detailed report on the attached complaint even if the complainant might have been addressed in a previous proceeding. For the complaint, the report must include: (1) the name and address of the complainant; (2) specific devices receiving the interference (i.e. type of device, manufacturer's name, model number, and serial number); and (3) any assistance provided by W280EM for each device allegedly receiving the interference and whether such interference persists. Each of the complaints must be addressed individually.

The Commission's Rules regarding FM translators restrict FM translator stations to operate strictly on a secondary basis and limit their service. Section 74.1203(a)(3) states that an FM translator station will not be permitted to continue to operate if it causes any actual radio signal interference to the direct reception by the public of the off-the-air signals of any authorized broadcast station.¹ Actual interference is based on listener

¹ An FM translator station creating actual radio signal interference to any authorized broadcast station is obligated to eliminate the interference, regardless of the location where the impaired signal reception occurs.

complaints indicating that the signal they regularly receive is being impaired by the signal radiated by the FM translator station. Section 74.1203(b) states that if the interference cannot be properly eliminated by the application of suitable techniques, the operation of the offending FM translator station shall be suspended and shall not be resumed until the interference has been eliminated.

Within thirty days of this letter, W280EM must take appropriate actions required by the provisions of 47 C.F.R. § 74.1203 to resolve all complaints of interference to fulfill its obligations. Further action on this complaint will be withheld for a period of thirty days from the date of this letter to provide W280EM an opportunity to respond. Failure to correct all complaints within this time may require W280EM to suspend operation pursuant to 47 C.F.R. §§ 74.1203(e) and 74.1232(h).

A handwritten signature in black ink, appearing to read "James D. Bradshaw". The signature is stylized with a large initial "J" and a long, sweeping underline.

The old Inland steel.	It's like I start loosing the signal. Fading in and out.	If I am going to work in the morning and listening to Bob & Tom, I tend to switch to a Chicago station because it gets very irritating when you hear only part of a conversation. because of the bad reception. Also, on my way out of the mill, I tend to automatically listen to another station because I know the reception will be bad. A lot of guys I work with, feel the same way but will be reluctant to spent the time on your site telling you so.

ON I294 between route 1 and route 83 by the thorton quarry it is the worst.	I cant listen to 103.9 that fucken bullshit station in Shitcago IL is fucking with it. This happen this whole week. The FCC don't give a fuck about it because 103.9 plays white people music	There were no problems to until that Bullshit station in Shitcago IL came about. Let them play their shit noise on some other station. Nothing will be done about this because I don't have shoe polish on my face or speak mexican. When they bark something is done about it and when whites complain nothing is done as usuall.
148 Nick Linden	14617 Lee St Cedar Lake 46303	nick@njtwo.com 2197765348	1/23/2015 January 26, 2015 3:15 pm 3:15 pm Website	Several Locations along US 41. West and East on US 30 from US 41 in Schererville. As well as North of US 30 on US 41 (Indianapolis Blvd) into Hammond. I noticed also interference in the 173rd lot of Purdue University Calumet. It's hard to give exact locat	Often it sounds as though another station is trying to step on your frequency. Other times, it seems as though I may be on the edge of the broadcast pattern.	I don't remember when I first noticed it, but I do remember where it first happened. Driving West on US 30 in Schererville, getting ready to turn South on to US 41, between the BP Station and Teibels it seems as though someone had a FM Transmitter broadcasting quite close to that location. I completely lost X-Rock and got some other broadcast of music.

245 Jeff Nowak	15662 Prince Drive South Holland 60473	njack11@comcast.net 708-339-5905	1/2/2015 January 3, 2015 2:54 pm 2:54 pm Website	8401 Indianapolis Blvd Highland, IN (Parking lot of Ultra Foods)	Signal overridden by another station.	This has been happening since early December, all over the area. At the location given, I was finally able to identify the station causing the interference. It is W280EM "The Groove". According to the FCC website, this station transmits from the Hancock Center at only 17 watts. A Class D station that is also broadcast on a sub-channel of WTMX 101.9. It went on the air on December 6th. In a moving car, you pick up little blips of this station, but in certain spots, it will knock WXRD off completely. Particularly bad areas that I have noticed are at Ridge Road and Calumet Avenue and north on Calumet from Ridge to about Broadmoor in Munster, IN. Also, River Oaks Drive between I94 and Greenwood in Calumet City, IL.
