Re: W266AW (FX), North Adams, MA
University of Massachusetts
Facility Identification Number: 142212
Special Temporary Authority (STA)
BESTA-20150409ABI

Dear Licensee:

This is in reference to the request filed April 9, 2015, on behalf of the University of Massachusetts ("University"), seeking a second extension of the Special Temporary Authority (STA) granted April 14, 2014. University explains that a replacement tower has been constructed, and the licensee has just filed a minor change application to move to that location (BPFT-20150413AAT).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made significant progress toward restoration of licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for STA extension IS HEREBY GRANTED. Station W266AW may continue to operate from its licensed site with the following facilities:

| | |
|---------------------------|---------------------|
| Channel | 266D (101.1 MHz) |
| Effective radiated power: | 0.010 kilowatts (V) |
| Antenna height: | |
| above ground: | 5 meters |
| above mean sea level: | 624 meters |
| Above average terrain: | 124 meters |

University must notify the Commission when licensed operation is restored. University must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on October 13, 2015

Sincerely,

Dale Bickel
Senior Engineer
