Re: KXEN(AM), St. Louis, Missouri
Facility Identification Number: 54739
BDJ Radio Enterprises, LLC (BRE)
Special Temporary Authorization (STA)
BESTA-20150513AAV

Dear Mr. Kaufman:

This is in reference to the request filed on May 13, 2015. BRE requests a further extension of the STA originally granted on July 23, 2012, and last modified on May 23, 2014, to operate station KXEN(AM) with temporary facilities during nighttime hours (with no change to the licensed daytime facility) due to the sale of part of the licensed site containing the nighttime directional antenna.¹ In support of the request, BRE states that in the past six month STA period it has located multiple potential new sites, but has not yet commenced negotiations with other site owners (in order to file an FCC Form 301 application to change site).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KXEN(AM) may continue to operate using the licensed site daytime facilities and at night with the following temporary facilities:

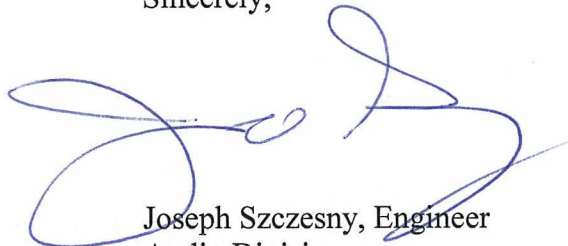

¹¹ KXEN(AM) is licensed for DA operation on 1010 kHz with 50 kW day and 0.5 kW night.

Geographic coordinates:	38° 38' 09" N, 90° 11' 45" W (NAD 1927)
Frequency:	1010 kHz
Operating hours:	Nighttime
Operating power:	0.125 kW nighttime
Antenna:	74.2 meter vertical wire supported on face of a self supporting tower located at the studios of KDNL(TV)
Radiator height:	90°
ASRN:	1003524

It will be necessary to further reduce power or cease operation if complaints of interference are received. BRE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that BRE will file an acceptable FCC Form 301 application before the expiration date shown below to show that substantial progress has been made toward restoration of licensed operations.

This authority expires on **December 3, 2015**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Szczesny', is written over the typed name.
