

EKO MEDIA GROUP, INC.

May 14, 2015

Jerome J. Manarchuck, P.E.  
Electronics Engineer  
Media Bureau/Audio Division

Dear Mr. Manarchuck

This is in response to the questions that you asked in the email that you sent to my attorney on May 11 requesting additional information concerning Eko Media's above-referenced request for an STA to operate Station WRJE non directionally with a single tower at reduced power.

As stated in a notice of resumption of operations filed January 13, 2015, WRJE resumed operations using a single tower located at the station's licensed site (the only one of the towers associated with the licensed facility that remained standing at reduced power. These were the same facilities that the station was operating with, and had been operating with for a number of years, at the time Eko Media acquired the station on March 20, 2012, with which Eko Media had continued to operate the station until it was forced to cease operations on January 14, 2014, when the power company cut off power at the site because the site owner had not paid the power bill. The single tower used by WRJE to resume operations on January 13, 2015, is the tower designated as #1 on the Station's license located at 39° 10' 11" N and 75° 33' 13" W. Photos of the tower and transmitter shack taken on May 13, 2015, are attached to the email by which this letter is being sent to you.

At the time Eko Media acquired WRJE, there were two towers still standing at the station's transmitter site, one of which, tower #1, was used in the non directional reduced power operations. It was the second unused tower that I was referring to when I stated in Eko Media's request for authority for WRJE to remain silent filed August 8, 2013, that the landlord had taken down a tower.

I hereby state under penalty of perjury that the foregoing information is true and correct to the best of my knowledge and belief.

Jose Roberto Ekenomo

President of Eko Media Group, Inc.
