Re: Request for Further Extension of Time to Respond to 30-Day Letter
Newark Public Radio, Inc.
NCE Station WBGO(FM), Newark, NJ (Fac. ID 48699)
FCC File No. BXPED-20111213ABU

Dear Ms. Dortch:

On behalf of Newark Public Radio, Inc., licensee of noncommercial educational radio station WBGO(FM), Newark, New Jersey, we respectfully request an additional three month extension of time, up to and including October 15, 2015, to amend the above-referenced auxiliary antenna construction permit application in FCC File No. BXPED-20111213ABU.

On April 16, 2015, Newark Public Radio requested a 90-day extension in connection with an FCC Media Bureau letter dated January 15, 2015. By that FCC letter, the Media Bureau had informed Newark Public Radio that further action on the auxiliary permit application would be withheld until such time as the applicant could provide requested information concerning Federal Aviation Administration (FAA) approval and FCC registration of the proposed auxiliary facility site's antenna structure.

Newark Public Radio's engineering consultant filed the necessary application with the FAA on February 11, 2015 in FAA Aeronautical Study Number 2015-AEA-735-OE. However, Newark Public Radio subsequently received a reply letter from FAA which indicated the need for additional specificity and data concerning the building which constitutes part of the antenna structure. As Newark Public Radio previously informed the Bureau, it faced delays in securing the requested information, and it recently determined that it would need to retain a professional surveyor in connection with that process. Newark Public Radio most recently contracted with a surveyor to conduct the necessary work, and has been informed that the survey process should take place with a matter of weeks. Following the surveyor's analysis, Newark Public Radio will need to update its FAA filing, and after the FAA process is completed, Newark Public Radio is prepared to move forward with the FCC Antenna Structure Registration process so that it may then amend its auxiliary antenna permit application. For these reasons, Newark Public Radio respectfully requests an additional three months to allow for the completion of this process, including the requested amendment of the application.

Marlene H. Dortch, Esq.
