Re: Mendocino County Public Broadcasting  
Call Letters KZYX

Dear Mr. Doyle and FCC:

It has come to my attention that some disgruntled persons have filed very legal-looking letters requesting the FCC deny KZYX their broadcasting license renewal. The person(s) filling these letters are known in Mendocino County as instigators of lawsuits and accusations against otherwise reputable persons and companies here in the County in order to gain recognition and personal gain.

I have been associated with KZYX for several years, as have many outstanding citizens of this County, and in fact continue to broadcast a weekly radio program to KZYX' many loyal listeners. KZYX has operated for twenty-five (25) years with integrity and compliance with the FCC. Listeners depend on public radio, especially the quality of KZYX, for coverage of local disasters, local news and the best in entertainment.

It has come to my attention that those perpetrating these denial letters, in fact, wish to take over the radio station to make it more along the lines of the small, radical leftist station KMEC. KZYX represents the majority of persons living and working in Mendocino County, strictly abides by FCC rules and somehow the staff of this small station handle over 100 volunteer programmers, raise all their funding from the community, and have become one of the lifelines linking this large County.

Please renew the FCC license immediately for KZYX. These detractors are already costing the station valuable staff time and precious resources, totally disregarding the wellbeing of the listeners, members and the station itself.

Thank you for your diligence in this matter - reasonable minds will succeed,

Katharine Cole
