Re: WGDJL(AM), Lares, PR, (Fac ID 36564), BESTA-20150724AAX  
Requested Response to Grant

Dear Ms. Dortch:

For Lares Broadcasting Corporation ("LBC"), licensee of AM Station WGDJL, Lares, Puerto Rico, we are filing the original and two copies of this request asking the FCC to electronically reissue the Station's license, BL-19860606AG, to correct errors that have been found in the license. Specifically, the reissued license should specify that the coordinates for the WGDJL tower (ASR # 1011978) are: 18-17-35 N. Lat. 66-53-48 W. Long.

Also, the tower heights should be adjusted to reflect these measurements (in meters):

Elevation above mean sea level 364.8	Overall height AGL 64.2
Overall height AMSL 429.0	Overall height AGL w/o appurtenances 64.2

Lastly, we request that the International Bureau send a formal notification letter to the government of the Dominican Republic to certify that Station HIBS is now authorized to operate on 670 kHz. We ask that the FCC take official notice of the HIBS website which indicates the station is operating at 670kHz and also has links to the station's Facebook and Twitter accounts showing the same operating frequency:
