Re: Lewis Broadcasting, LLC
WJZI(AM), Decatur, Indiana
Facility Identification Number: 71465
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed September 11, 2015, on behalf of Lewis Broadcasting, LLC ("LBL"). LBL requests special temporary authority ("STA") to operate station WJZI(AM) with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, LBL states that WJZI(AM) went off the air on September 14, 2014, due to a lightning strike, damaging the station's equipment. The licensee was nearing being able to return the station to the air when on April 9, 2015, high winds caused the collapse of the station's tower. The tower has not been constructed and therefore WJZI(AM) requests STA to operate with emergency antenna facilities in order to resume broadcast operations before 12:01 a.m., September 15, 2015.

Specifically, WJZI(AM) proposes to operate from its licensed site location with a 151 foot long wire antenna stretched 10 feet above the ground between two poles. The proposed operation will operate with no more than 62.5 watts, which is 25% of the station's licensed power.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(1) provides that AM stations using an emergency non-directional antenna in lieu of authorized directional facilities shall operate with power reduced to 25 percent or less of the nominal license power, or a higher power, not exceeding licensed power, while insuring that the radiated field strength does not exceed that authorized in any given azimuth.

Our review indicates that station WJZI(AM) has been silent since September 14, 2014, and therefore grant of the STA is necessary as the station needs to resume broadcast operations

¹ WJZI(AM) is a daytime only station licensed for operation on 1540 kHz, with a power of 0.25 kilowatt, and employing a nondirectional antenna pattern (NDD-D).

immediately.

Accordingly, the request for STA IS HEREBY GRANTED. Station WJZI(AM) may operate with the following facilities:

Coordinates:	40° 49' 14" NL, 84° 55' 12" WL (NAD 1927)
Frequency:	1540 kHz
Operating hours:	Daytime only
Operating power:	62.5 watts
Antenna:	151 foot (46 m) emergency wire antenna
Overall height above ground level	3.0 meters (10')

It will be necessary to further reduce power or cease operation if complaints of interference are received. LBL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **March 13, 2016**.

Notwithstanding the grant of this STA or the expiration date specified herein, the station's license will expire as a matter of law if broadcast operations do not commence by 12:01 a.m., September 15, 2015. *See* Pub. Law No. 104-104, 110 Stat. 56, Section 403(1)(1996) and *Order, Silent Station Authorizations*, FCC 96-218 (released May 17, 1996). *See also Public Notice, Expedited Processing of Applications Filed by Silent Stations*, DA 96-818 (May 22, 1996). The licensee must notify the Audio Division immediately upon resumption of broadcasting.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;

- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in blue ink that reads "Jerome J. Manarchuck". The signature is fluid and cursive, with the first name "Jerome" and last name "Manarchuck" clearly legible.
