Re: Radio License Holding CBC, LLC (RLHC)
KKAT(AM), Salt Lake City, UT
Facility Identification Number: 11232
Special Temporary Authority (STA)
BESTA-20151014ADI

Dear Mr. Denning:

This is in reference to the request filed on October 14, 2015. RLHC requests an extension of the STA granted on August 22, 2013, to operate station KKAT(AM) with reduced power daytime using the nighttime transmitter due to severe damage to the 10 kW daytime transmitter.¹ In support of the request, RLHC stated that additional time is needed to allow for further action on the AM Revitalization proceeding (MB Docket 13-249) before improving the facility and resuming licensed operations (since unable to obtain repair parts for the 10 kW transmitter in the past two years).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

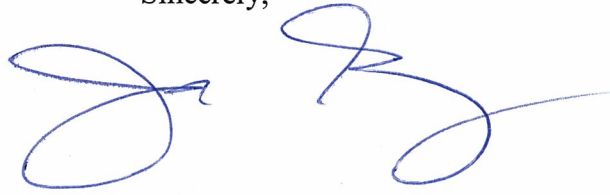

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KKAT(AM) is licensed for ND operation on 860 kHz with 10 kW (D), 3 kW (CH), and 0.196 kW(N).

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and station KKAT(AM) may continue to operate daytime with reduced power. RLHC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. Due to the recent adoption of the AM Revitalization proceeding², Cumulus must begin preparations to file an FCC Form 301 application to show that substantial progress has been made (if not planning on installing a new 10 kW daytime transmitter to resume licensed daytime operations).

This authority expires on **May 16, 2016**.

Sincerely,

A handwritten signature in blue ink, consisting of a large, stylized 'J' followed by a series of loops and a long horizontal stroke.

Joseph Szczesny, Engineer
Audio Division, Media Bureau
