Hi Art,

As discussed, the overall tower height needs to be corrected to 78 meters AGL for BNPH-20151013AJF to match the ASR. (The ground elevation was inadvertently entered.) It's my understanding that this change can be made informally via this e-mail.

Note that if you come across any other of the Mekaddesh Group Corporation applications with this error, the intention was not to change the overall antenna height from that of the ASR.

Thanks for the call on this,

Darryl
