Re: KXEN(AM), St. Louis, Missouri
Facility Identification Number: 54739
BDJ Radio Enterprises, LLC (BRE)
Special Temporary Authorization (STA)
BESTA-20151116ASI

Dear Mr. Kaufman:

This is in reference to the request filed on November 16, 2015. BRE requests a further extension of the STA originally granted on July 23, 2012, and last modified on May 23, 2014, to operate station KXEN(AM) with temporary nighttime facilities at an alternate site with no change to the licensed 50 kW daytime facility (due to the sale of part of the licensed transmitter site).¹ In support of the request, BRE states that in the past six month STA period it has undertaken additional steps to propose a new transmitter site facility in order to resume licensed operations, but has not yet filed the required FCC Form 301 application pending completion of all approvals needed for a new site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and station KXEN(AM) may continue to operate during the day using the licensed 50 kW daytime facilities

¹¹ KXEN(AM) is licensed for DA operation on 1010 kHz with 50 kW day and 0.5 kW night.

and at night with the following temporary facilities:

Geographic coordinates:	38° 38' 09" N, 90° 11' 45" W (NAD 1927)
Frequency:	1010 kHz
Operating hours:	Nighttime
Operating power:	0.125 kW nighttime
Antenna:	74.2 m vertical wire supported on face of a self-supporting tower located at the KDNL(TV) studios
Radiator height:	90°
ASRN:	1003524

It will be necessary to further reduce power or cease operation if complaints of interference are received. BRE must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. If BRE decides in the next few months that it is no longer feasible to change sites to resume licensed operations, then it will have to consider another viable option such as cancelling the proposed sale of the daytime site and filing an FCC Form 301 application to propose a new permanent nighttime facility (using one or more of the existing daytime towers to reduce costs).

This authority expires on **June 15, 2016**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Szczesny', with a large, stylized flourish extending from the end of the name.
