Eduardo R. Albino, President Media Power Group, Inc. 171 Carlos Chardon Avenue, Suite 401 San Juan, PR 00918-0903

> Re: Media Power Group, Inc. (MPG) WSKN(AM), San Juan, PR Facility Identification Number: 10062 Special Temporary Authorization (STA) BESTA- 20151123APT

Dear Mr. Albino:

This is in reference to the request filed on November 23, 2015. MPG requests an extension of the STA granted on May 27, 2015, to operate station WSKN(AM) by diplexing with station WRSJ(AM) at its current STA site due to loss of both licensed transmitter sites.<sup>1</sup> In support of the request, MPG states that additional time is needed to file an acceptable FCC Form 301 application to permanently operate from the STA site due to vandalism at that site.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

We noted that the related recent WRSJ(AM) STA extension letter granted last month stated the radiator height is 45.7 meters and the overall height is 48 meters, and the pending WRSJ application (BP-20150901ADD) also shows those same heights, so we have corrected this STA to reflect those heights below. In addition, the nighttime site latitudinal coordinates are incorrect in BP -20150901ADD, so that application has been placed on hold for the next 30 days without further action to allow time for Mr. Olivera to check for any other errors, and then file a curative electronic amendment (must be amended from 50 to 59 seconds).

<sup>&</sup>lt;sup>1</sup> WSKN(AM) is licensed for ND operation on 1320 kHz with 5 kW day and 2.3 kW night.

Accordingly, the request for extension of STA is hereby GRANTED, and station WSKN(AM), may continue to operate with the following facilities:

Geographic coordinates	N 18° 20′ 59″ N, W 66° 09′ 26″ (NAD 1927)
Frequency	1320 kHz
Hours of operation	Unlimited
Operating power	4.2 kW (day) and 2.3 kW (night)
Antenna type	Existing WRSJ(AM) tower
Radiator height:	45.7 m
Antenna efficiency:	276.4 mV/m/km/kW
Overall Height:	48.0 m

It will be necessary to further reduce power or cease operation if complaints of interference are received. MPG must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.13 10. We anticipate that MPG will file an acceptable FCC Form 301 application before the expiration date shown below to show that substantial progress has been made.

This authority expires on June 21, 2016.

Sincerely, Joseph Szczesny, Engineer Audio Division Media Bureau
