FCC Mail Room

Dear FCC Staff:

I am hereby informing you that as of November 20, 2015, AM radio frequency 1330 WSPQ went off the air due to a catastrophic event at our transmitter. At this time, I am being told that the PDM boards have ceased operation and would need replacement. Also, the PM AMP board has ceased and will need to be sent out for repair. Estimated time for repair is 3 weeks once board is received.

I am aware that we have 30 days from the date of the event to be in a discontinued operation mode, but from the estimates I am getting for new equipment and repair of existing, I would gather we will go past that mark. I will make a written request for additional time if events require that action.

Regards,

Donna J Grant
